

Minimize your risk and protect your equipment

Our Trimble Protected protection plans are made with you in mind. Trimble Protected Plus plans cover everything that your original Trimble® standard product warranty covers, plus several value-added enhancements, ensuring that you're covered if the unexpected happens. You'll benefit from the list of additional features and enjoy less downtime, increased productivity and less stress.

Don't wait, start future-proofing your livelihood today.

Features

Our plans offer protection against:

- Wear and tear from repetitive use.
- Surge damage on your equipment when using Trimble power supplies.
- Environmental damage from dust, heat, humidity and salt air.

An additional feature is our preventive maintenance service (adjustments & calibration) for total stations available with select plans.

Benefits

- **Your money goes further**—on average a protection plan costs less than the cost of a repair.
- **Less wait time**—covered repairs are typically fixed faster with a protection plan because no quotes and approvals are needed.
- **Quality repairs**—backed by Trimble's quality parts and quality repair service; a value you can trust.
- **Be worry-free**—a protection plan helps keep you working on your project with minimum downtime.

Trimble Protected

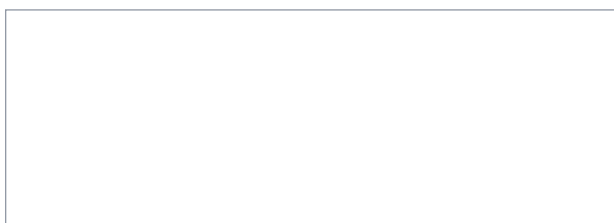

If you decide to upgrade to newer Trimble equipment, a Trimble Protected Plus protection plan can add valuable dollars to the final sale of your current equipment. Plans come with transferable ownership (plan follows serial number).

If you sign up today for a Trimble Protected Plus protection plan, you can look forward to lapse-free coverage after your standard product warranty has expired. If your equipment is not covered by a protection plan or standard product warranty now, we also offer a great reinstatement option to bring your equipment back under coverage with a protection plan.

Hardware

Category	Product Name
Data Collectors & Tablets	Trimble TSC7 controller, Trimble TSC5 controller, Trimble TDC6 data collector, Trimble CU (Model 3 & TCU5), Trimble T7 tablet, Trimble T100 tablet, Trimble T10x tablet, Settop M1 monitoring controller
GNSS Receivers	R4s, R2, R10-2, R12, R12i, R750, R780, R580
Digital Levels	Trimble DiNi® 0.3/0.7
GPS/GNSS Antenna	Zephyr™ 3, Combined GPS/H-field Loop antenna, Compact Geodetic antenna (L1)
Radios	Trimble TDL 450L, TDL 450Hx, TDL 2.4, TDL 450B, EDB10
Mechanical Total Stations	Trimble C3, C5
Optical Total Stations	Trimble S5, S5 Ti-M, S7, S9
Scanning Total Stations	Trimble SX10, Trimble SX12
Laser Scanners	Trimble X7, Trimble X9
Targets	AT360, MT1000
3D Scanning	Trimble TX6
Empower™ Modules	EM100, EM110, EM111, EM120, EM130, EM450, EM940
